FOR IMMEDIATE RELEASE

Venture Construction Group of Florida kicks off statewide annual giving campaign
Local construction and restoration company raises monies for ALS Association

MIAMI – Venture Construction Group of Florida, leader in residential and commercial construction, renovations, insurance restoration, storm damage repairs, and 24/7 emergency services, sponsors numerous ALS charitable events throughout the state for their 2015 annual corporate giving campaign. The company kicked off its 2015 campaign at the *Walk to Defeat ALS* in West Palm Beach, Florida on March 21, 2015. Venture Construction Group will sponsor the *Walk to Defeat ALS* in Miami-Dade County on September 26, 2015; and will sponsor the *Ride to Defeat ALS* in Tampa, Florida on November 7, 2015. Venture Construction Group of Florida donates thousands of dollars to the ALS Association every year.

“Part of our company mission is to help people in need. Philanthropic giving is an absolute must. My dad was diagnosed with ALS in 2010 and passed away in 2012. He was a great man and instilled in me the importance of giving back. Watching him endure this was painful. It totally changed my life. I am determined to help beat this disease by supporting ALS research to help find a cure,” says Steve Shanton, CEO and founder of Venture Construction Group of Florida.

According to the ALS Association, amyotrophic lateral sclerosis (ALS), often referred to as "Lou Gehrig's Disease," is a progressive neurodegenerative disease that affects nerve cells in the brain and the spinal cord. The disease affects the nerve cells (motor neurons) that control a person's muscles. As the disease causes these motor neurons to deteriorate, the brain loses the ability to start and control voluntary muscle movement.

“Having a construction and restoration company headquartered in Florida means we help a lot of property owners rebuild after catastrophic storm events. We definitely see some of our nation's worst storms here. I am passionate about the storm repair and insurance restoration business because it allows me to help people rebuild after disaster strikes. I have the same passion for life and my business. Work with passion, give with passion, and always take the time to help others,” says Steve Shanton, CEO and founder of Venture Construction Group of Florida.

In addition to providing construction, renovation and restoration services, Venture Construction Group of Florida helps property owners recover quickly after storm events such as hurricanes, tornadoes, hail, wind, fire, and flood. Venture Construction Group of Florida has helped thousands of homeowners, commercial property owners, and property management companies recover from disasters and storm damage throughout Florida. Giving back to philanthropic charities is also an integral part of the company's mission. Parent company Venture Construction Group also donates tens of thousands of dollars annually to other charities throughout the nation including ALS Association, Robert Packard Center for ALS Research at Johns Hopkins, Luke's Wings, the National Multiple Sclerosis Society, Susan G. Komen and more.
